

# SHARP INTERNATIONAL SERVICES

TOLL MANUFACTURING ♦ PACKAGING ♦ WAREHOUSING ♦ TRANSLOADING

## TOLL MANUFACTURING

Having trouble finding both flammable and dry to liquid blending? Everyone does. Call us!

Our Class I, Div 2 blend plant can service your needs – particularly if you service North America with specialized chemistry that needs to be blended and shipped out via rail.

## WAREHOUSING

With over 300,000 square feet under roof, we provide warehousing and logistics services to the global freight and logistics industry.

Specializing in repackaging hazardous goods, we look forward to solving your freight and warehousing challenges in the Gulf Coast.

## PACKAGING

One of our core values is 1 or 1,000.

Whether you need to package 1 pail or 1,000 totes – let us help provide all the different packaging services for your business.

The good news is we have room to store those 1,000 totes under roof.

## TRANSLOADING

Your Bottom Line Matters. Period.

We have a mile of privately-owned track serviced daily by the BNSF. We have direct entry into our warehouse via rail as well as track that runs adjacent to our blend plant. Let us know if we can service your rail-to-truck and truck-to-rail transloading needs.
